GARNITURI PROFILATE DIN CAUCIUC PENTRU CONTAINERE

Garnituri profilate din cauciuc pentru containere

Linia noastră de profilare din cauciuc reprezintă o soluție de vârf pentru producția de profile din cauciuc. Cu un tunel de vulcanizare cu o impresio-nantă lungime de 8 metri, acest sistem este proiectat pentru a produce profile cu o lățime maximă de 120 mm. Componentele principale ale liniei noastre,

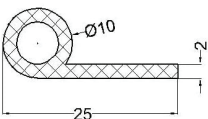

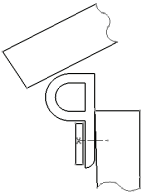

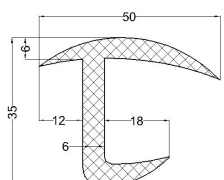

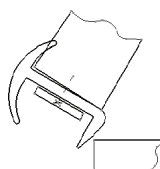

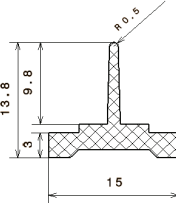

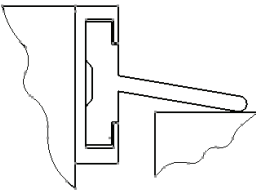

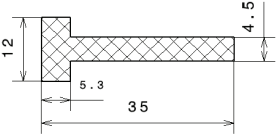

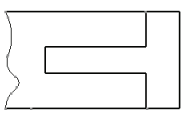

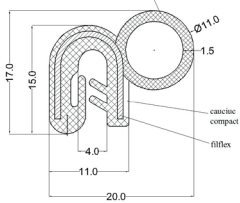

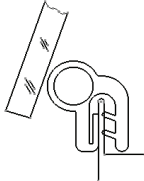

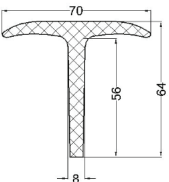

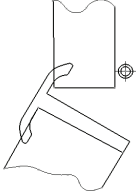

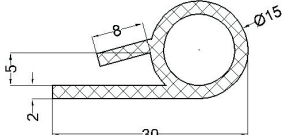

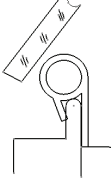

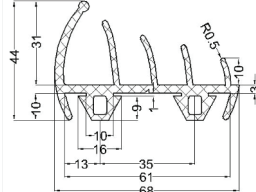

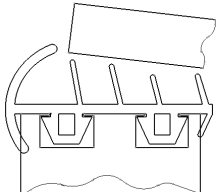

extruderul cu vid de tip EEK 45.16 V – 12/70 și tunelul de vulcanizare cu aer cald de tip RC-HLT 60/8 EL, sunt personalizate pentru a se potrivi perfect procesului nostru de producție. Această linie de profilare cu aer cald este o investiție în performanță și eficiență.
